**Email address:** igorstevanovic99@gmail.com

## Profile

Mobile Engineering Lead with hands-on experience building and scaling consumer mobile systems used by millions of users. Currently, leading mobile development at Talk360, with prior experience at SwissBorg, LotusFlare, and Domain Money. Founder and CTO of ChooseCruise, where I designed and shipped a full-stack platform end-to-end. Strong focus on mobile architecture, cross-platform systems (Kotlin Multiplatform), developer productivity, CI/CD, and real-world engineering tradeoffs.

## Work Experience

12/2025 – present  
Amsterdam, Netherlands

### Mobile Team Lead

**Talk360**

- Leading and managing the mobile engineering function (Android & iOS), including mentoring and line management of 2 engineers.
- Owning end-to-end delivery for mobile: ticket creation, work breakdown, prioritization, release preparation, and production rollout.
- Actively involved in product leadership decisions alongside Product Lead and Tech Lead, contributing to roadmap definition and tradeoff discussions.
- Responsible for mobile architecture, technical direction, and code quality across platforms.
- Driving Kotlin Multiplatform adoption and modern mobile practices (Jetpack Compose, SwiftUI).
- Owning mobile hiring, onboarding, and technical interviews.
- Ensuring release readiness, stability, and coordination across Product, Backend, and QA.

10/2022 – present  
Remote

### Senior Mobile Engineer

**SwissBorg**

- Worked on improving and implementing new features using Kotlin Multiplatform for the shared code, Jetpack Compose, and SwiftUI for the UI native code.
- Collaborated with cross-functional teams to implement a robust API integration, which streamlined data flow and improved app performance, resulting in a 25% reduction in loading times.
- Optimized existing code and implemented best practices in app development, which not only reduced bugs by 40% but also improved app stability and user satisfaction.
- Led a series of code reviews and knowledge-sharing sessions, helping to elevate the skills of team members and fostering a culture of continuous improvement within the engineering team.

06/2024 – present

### CTO & Founder

**ChooseCruise**

- Founded and led the technical development of a cruise booking platform, acting as the final decision-maker for all technical and architectural choices.
- Owned end-to-end system design across mobile apps (Kotlin Multiplatform), web platform (React + TypeScript), and backend services (Node.js + TypeScript).
- Architected and operated AWS infrastructure, CI/CD pipelines, and deployment strategy, balancing speed, cost, and scalability in a bootstrapped environment.
- Made tradeoff decisions across scope, technical debt, reliability, and time-to-market under real startup constraints.
- Implemented analytics and experimentation to inform product direction and marketing decisions.

## Work Experience

---

- Worked directly with partners and end users, translating business needs into technical solutions.

03/2022 – 10/2022  
New York, New York, United States

### **Android Engineer Domain Money**

- Created an app for a large user base.
- Collaborated with cross-functional teams, including designers, product managers, backend developers, and iOS developers, to deliver a top-performing product.
- Improved app performance by 15% through the implementation of industry best practices.

12/2019 – 03/2022  
Belgrade, Serbia

### **Android Engineer LotusFlare**

- Led the development of an extremely successful app that attracted over 3,000,000 users and achieved a 99.8% crash-free user rate.
- Actively set up, created, and developed the app from the ground up, ensuring that it met the highest standards of quality and performance.
- Acted as a key contributor to the library responsible for communication between the android app and the server, ensuring seamless integration and optimal performance.
- Collaborated closely with cross-functional teams, including designers, product managers, backend developers, and iOS developers, to deliver a truly outstanding product.
- Actively sought out new technologies and methodologies to improve the product and stay ahead of the competition.

09/2019 – 12/2019  
Belgrade, Serbia

### **Android Engineer Intern LotusFlare**

- Maintaining and introducing new features in the app while keeping more than 99.9% crash-free users.
- Contributing to the library responsible for communication between the android app and the server.

## WRITING & THOUGHT LEADERSHIP

---

- Author of technical articles on Medium covering mobile engineering, architecture, and real-world development tradeoffs.
- Multiple articles reached 25,000+ views, read by practicing engineers and technical leaders.
- Topics include Kotlin Multiplatform, Jetpack Compose, mobile architecture, and delivery practices.

## Education

---

10/2022 – 10/2024  
Belgrade, Serbia

### **Software Engineering | Master of Engineering - MEng University of Belgrade, School of Electrical Engineering**

10/2018 – 10/2022  
Belgrade, Serbia

### **Computer Engineering and Information Theory | Bachelor's degree University of Belgrade, School of Electrical Engineering**

## Awards

---

03/2022

### **FON Hackathon 2022 (Second place) FONIS**

We created a Carbon footprint Android app with which you can track your carbon emission.

## Awards

---

09/2021

### **WHOIS Hackathon 2021 (First place)**

We built a native Android and iOS app in which you can search various domains and get their info.

## Certificates

---

09/2020

### **HackerRank Problem Solving (Basic) Certificate**

**HackerRank**

<https://www.hackerrank.com/certificates/905b93afb7aa>

08/2020

### **HackerRank Java (Basic) Certificate**

**HackerRank**

<https://www.hackerrank.com/certificates/a549efafbbe3>
